

Read Me Ceres5.00.77 Record Link Fails to Link to a Website
(Ceres5.00.77)

Service Request or Support Case:

Issue addressed: When trying to establish a link to a non-file (i.e. website), the link fails if you have a file path specified in the record links on the company information page.

Objects Affected:

Type	ID	Name
Table	2000000068	Record Link

This release does not present a change in system usage methodology.

Resolution:

- Table 2000000068 (Record Link) is updated by excluding website links in custom logic that handles central storage of links in a shared directory.
